Dear Fletch,

Thanks for your 5/15/ recollections. I'm sorry I don't now recall why but I think it was the Wasp that was on the Indonesia operation.

Maybe some day we'll see a reference in print and of the code name.

I'm sure we'll hear no more from Navasky. What remains to be see is whether he has learned enough to overcome the prejudices he and Kopkind undulged it and not to publish more of that propaganda again.

We have no way of knowing whether he got other letters setting him straight.

Ditto for Kopkind.

I'm not at all convinced that Navasky did and does that kind of thing to hold his job.

I think that he and Kopkind really believe their crap as they rewrite that part of our history.

Best,

Jack
